Threaded Rod Trouble? Call Tuttle!

Tradition, quality, dependability, service, that has been the credo of Tuttle Manufacturing Company since our founding in 1929. With an emphasis on personalized service and a combined century of experience and expertise by our staff, we offer our customers a wide array of Threaded Rods, Studs, U-Bolts, J-Bolts and special products made to your specifications. As a division of Arlington Fastener Company, our customers also have access to a complete range of fasteners and related products as well as the support of a major fastener manufacturer and distributor. We have our eyes on the future, toward expansion and new ideas to better serve our customers.

At Tuttle Manufacturing Company your satisfaction is our first consideration. This is our philosophy and we believe it has been mutually beneficial for our customers and for Tuttle Manufacturing Company.

Threaded Rods

We manufacture threaded rods from 0-80 to 3½" diameters, lengths up to 20 feet.

- ▶ steel
- ▶ brass
- ▶ aluminum
- ▶ copper
- ▶ stainless steel (B-7 and many other alloys)
- ▶ left or right hand threaded

Manufacturing and Warehouse Facility

We implement the most modern, state of the art manufacturing processes by personnel that are committed to quality and craftsmanship. We keep our warehouse well stocked with a large variety of

raw materials. This allows us to easily handle your orders, regardless of the quantity.

Studs

Tuttle manufactures studs from 0-80 dia. to 3 1/2" dia. in most materials, both rolled and cut thread, full body diameters and undersized body diameters.

- ▶ continuous thread
- ▶ single end thread
- ▶ double end thread

Special Bent Bolts

We custom manufacture the following bolts in steel, stainless steel and brass. They are available in diameters from 4-40 to 2".

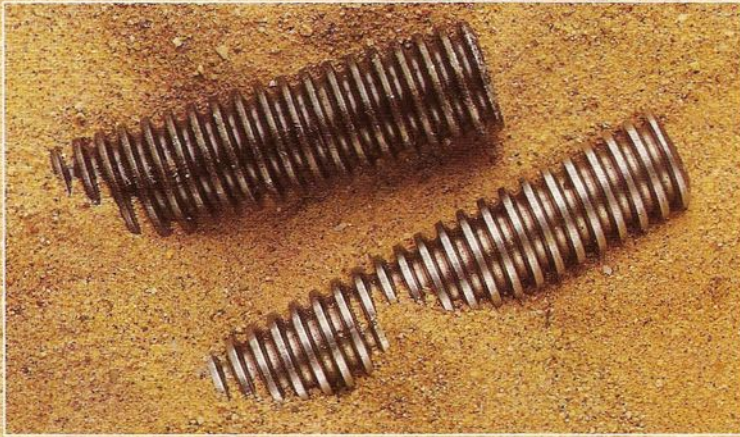

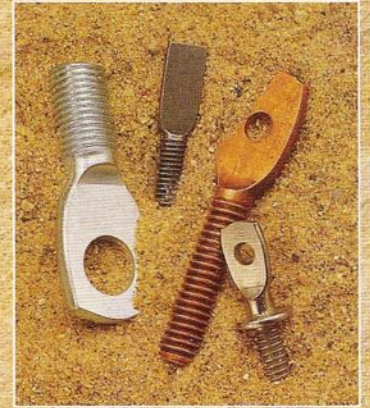

- ▶ J-bolts

- ▶ U-bolts
- ▶ L-bolts
- ▶ eye bolts
- ▶ special wire forms

Spade Bolts

These bolts are available in 6-32 to 1/2-13" diameter with or without holes.

Continuous Threaded Acme Bars

We manufacture in diameters from 3/8" to 3 1/2" available in the following materials:

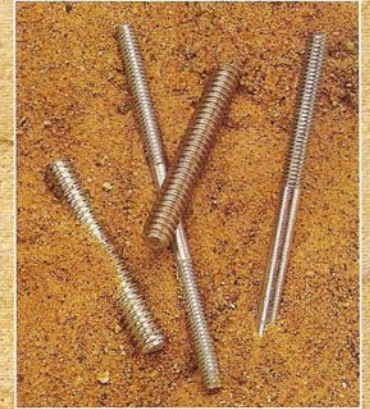

- ▶ carbon steel
- ▶ B-7
- ▶ stainless steel
- ▶ brass
- ▶ other non-ferrous materials

Complete Parts or Secondary Operations

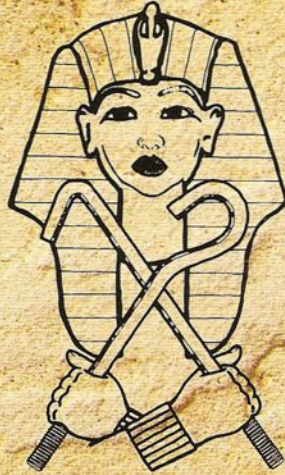

We can provide any of the following secondary operations:

- ▶ drilling
- ▶ flattening
- ▶ turning
- ▶ slotting
- ▶ threading
- ▶ bending
- ▶ notching

Metric

We provide prompt delivery of many metric parts in both popular and special thread sizes in ferrous and non-ferrous materials.
